SPECIALIZED FACILITY DESIGN SERVICES
FOR LEAN & TRADITIONAL PRODUCTION
LAYOUTS

Redesigning your workflow or renovating your facility can help maximize your efficiencies and profits. PPG MVP specialists evaluate existing collision center configurations and create state-of-the-art facility layout & designs. With extensive experience and sophisticated tools, they provide complete workflow analysis and make precise facility, process and equipment recommendations. Whether you want to build a new collision center, commercial truck shop, distributor store / warehouse facility or focus on improving the throughput processes in your existing facility, our experts will help assure that the right decisions are made.

- Maximize your facility capacity
- Leading edge industry processes
- Achieve a State-of-the-Art Facility

Traditional & Lean Designs | Collision Repair, Distributor &
Commercial Fleet | 2D / 3D CAD Designs | 3D Photo Realistic
Renderings | Presentation Boards for Planning / Zoning
Equipment Analysis | Autodesk Revit, Impression & 3DS Max

Overview of services

You are a collision shop owner or manager who is planning to build a new facility or upgrade an existing layout. The MVP Facility Layout & Design Service is an ideal place to start. Two things make these services unique; the MVP team's extensive knowledge and experience in the automotive and commercial fleet industry, combined with the state-of-the-art layout and design tools they use to analyze your operation.

We can provide services to assist you with:

- Assessment of operational objectives
- Workflow analysis
- Lean Process recommendations
- Redesign of existing layouts
- Design of new facilities
- Site planning
- Equipment recommendations
- Design coordination with architects
- Preliminary plans review

Questions we can answer

- Where should I start? I want to improve my production processes / facility layout.
- How can I improve throughput in my existing facility?
- Am I using my facility to its fullest capacity?
- I want to add a piece of equipment; is this the right decision?
- How should I implement my ideas in an existing facility?
- I want to do this "right the first time"...Can you help?

Planning is the most important part of any construction project. Let the MVP Layout & Design team apply their experience and "Go to work for you".
